

VW Environmental Mitigation Trust Propane/CNG School Bus Replacement Program

Questions from 06-07-19 Webinar

- Q. So this program will not include electric buses, you will have a separate program for that?
- A. The New Hampshire Office of Strategic Initiatives (OSI) will be releasing a Request for Proposals (RFP) for a VW Environmental Mitigation Trust Electric School Bus Replacement Program in the near future. Details on the Program will be available on the VW funding page of the OSI website:
<https://www.nh.gov/osi/energy/programs/vw-trust-funding.htm>
- Q. Will DES use DEQ or AFLEET to calculate emissions? Reason I ask, is AFLEET is a more accurate calculator for propane emissions vs. DEQ.
- A. Estimation of emissions savings associated with school bus replacement projects submitted for consideration will be completed utilizing a methodology that includes use of the Alternative Fuel Life-Cycle Environmental and Economic Transportation (AFLEET) Tool.
- Q. Will a copy of today's webinar deck be made available?
- A. Yes, a copy of the presentation from the 06-07-19 webinar is available on the VW funding page of the OSI website.
